

# Hexagon

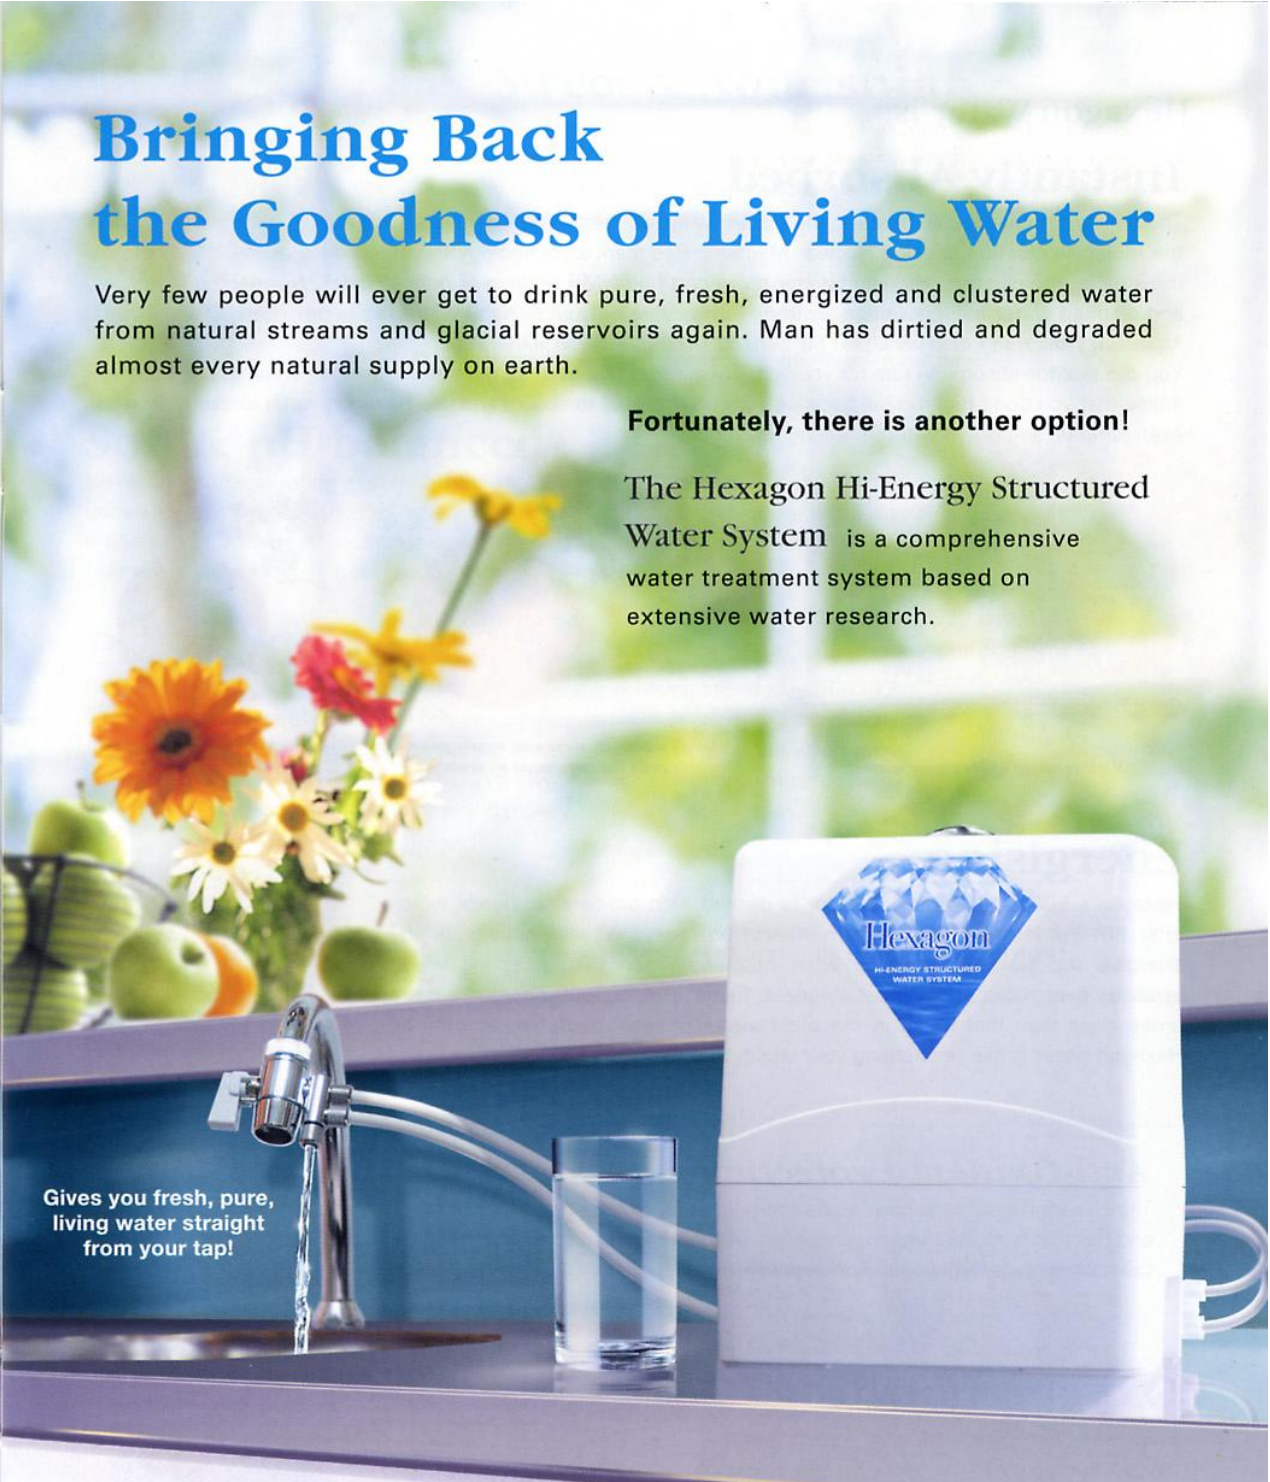

Hi-Energy Structured Water System

## Bringing Back the Goodness of Living Water

Very few people will ever get to drink pure, fresh, energized and clustered water from natural streams and glacial reservoirs again. Man has dirtied and degraded almost every natural supply on earth.

**Fortunately, there is another option!**

The Hexagon Hi-Energy Structured Water System is a comprehensive water treatment system based on extensive water research.

Gives you fresh, pure,  
living water straight  
from your tap!

- \* **No more boiling water!**
- \* **Easy-to-install**  
All you need to do is fix it to your kitchen tap!
- \* **Easy-to-maintain**  
Only the Ceramic Filter needs cleaning,  
every 3 to 4 weeks.

**Hexagon Hi-Energy  
Structured Water System**  
(31cm x 37cm x 20cm)

# Living Water

## The Way Nature Designed It

70% of our planet is covered with water, but 97% of it is oceanic salt water and 2% is glacial ice. To turn it into drinking water, Mother Nature has an incredible water treatment system. She utilizes the sun, the sky and almost every element of the earth to produce healthy, natural living water.

Movement and exposure to the sun, natural magnetic fields, rocks and soil are what give water energy, oxygen, minerals and a mysterious molecular structure made up of small hexagonal clusters.

### Living Water has 6 Essential Properties

#### It is Clean and Anti-pathogenic

Fresh, unpolluted natural water is healthy and self-cleansing, disease-causing microbes find it an unsuitable environment to thrive. The precise reason for this is not yet known, but research at the Adolfo Lutz Institute in Sao Paulo, Brazil shows that living water inhibits the proliferation of many types of microbes.

#### It is Alive with Vital Energy

The body's trillions of cells vibrate and pulsate to a complex system of harmonic frequencies. This pulsation of life enables cells to communicate with each other and perform crucial biological and chemical exchanges. Any disruption of this harmonic pulsation can cause pain, discomfort and disease.

Living water resonates with the energetic vibrations of your body. When you drink living water, it amplifies, animates and perpetuates your own life force. Drinking dead water on the other hand, has a detrimental effect because your body has to expend precious energy "turning it on" and giving it energy before it can be used for bodily functions.

#### It is Infused with Vital Oxygen

Oxygen is the fuel of life -the more you have of it, the better your body functions, and the healthier you are. Most of us think that we only take oxygen in through the air, but actually oxygen that is dissolved in water offers a much more direct route to our cells. Oxygen in our drinking water can reach the blood in 30 seconds; the brain in one minute; the skin in 10 minutes; and the liver, heart and kidneys in 20 minutes!

Living water offers abundant oxygen that is readily available to your cells. It also augments the oxygen you inhale which is especially helpful if you breathe poor quality air or if ageing or poor health have slowed down your oxygen uptake.

## **It is Rich with Ionic Minerals and Trace Minerals**

As water moves through earth, it gathers minerals and trace minerals, which are needed to conduct and generate billions of tiny electrical impulses in the body. Without these impulses, not a single muscle, including your heart, would be able to function, nor could growth and repair be accomplished. Dr Linus Pauling, two-time Nobel Prize winner, states: "You can trace every sickness, every disease. and every ailment to a mineral deficiency."

The minerals and trace minerals in water are the best for you because they are in ionic form—the form most bio-available to your cells (even better than chelated or colloidal minerals).

## **It has the Perfect pH**

Natural water with its rich mineral content has a slightly alkaline pH. It supports the average pH7.35 of your body fluids which is necessary for transporting oxygen, regulating metabolism, eliminating acidic waste, and preventing disease.

## **It has a Vital Hexagonal Structure**

Healthy water remembers its life as ice. It is neatly ordered in small molecular clusters that form perfect hexagonal shapes with rich minerals snuggled inside them.

When it is near freezing, the healthiest water has beautiful crystal snowflake formations. Unhealthy water on the other hand, typically has large or pentagonal molecular clusters or remains chaotically formless even as it starts to freeze.

### **Why is cluster structure important?**

Because it matches the clustered water found inside and around our body cells. Small clusters are perfectly designed to interact with other molecules, to communicate using energetic vibrations, and to slip easily through cellular membranes - carrying nutrients in and lifting toxic waste out of our cells to keep them young and vibrantly healthy. Large clusters are chaotic, clumsy and far less useful to the body.

Of all water's properties, its hexagonal structure is probably the most important, but is also the most fragile. It is easily destroyed by environmental contaminants and modern water treatment processes.

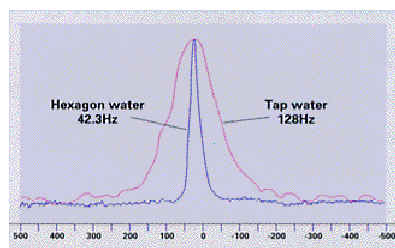

## Hexagon Water is:

### Instantly Absorbed

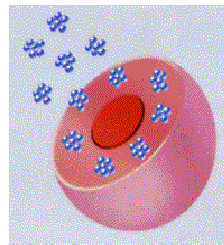

The smaller the molecular clusters, the easier water will penetrate your cells. One way to measure the size of the molecule clusters is using Nuclear Magnetic Resonance Technology (NMR). The lower the NMR reading, the smaller the clusters. Hexagon water has a certified NMR reading of only 42.3hz\*. Normal tap water, RO and distilled water have readings around 128HZ while bottled mineral water reads between 90 and 100Hz.

*\*National Tsing Hua University Report No. CMC 0203001 dated 28th March 2002.*

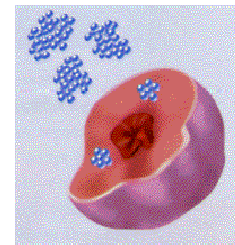

You can test the absorption rate for yourself. Try drinking two to three glasses of Hexagon water in one go. You'll notice that you don't feel too full because your body is able to absorb and use Hexagon water instantly. You can even jump up and down without feeling nauseous!

NMR reading of Hexagon water

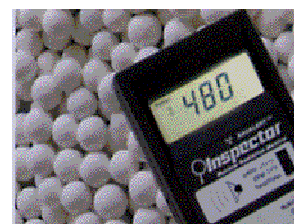

Small water clusters can easily penetrate cells/or improved hydration.

Large water clusters do not hydrate cells easily.

### Energising

Hexagon's EC3000 Energy Converter is packed with bio-ceramic beads which emit FIR (Far Infrared Rays), a form of electromagnetic waves, that vibrate and energise the water, mimicking what happens when natural spring water splashes over rocks and natural magnetic fields. The EC3000 energises three times more than that found in the other water filtration systems, so drinking Hexagon water is like re-charging your vitality!

### Anti-Oxidant Protection

The Hexagon treatment gives water important anti-oxidant properties. It contains negatively charged ions and has plenty of electrons to render free radicals harmless so they don't have to steal electrons from your cells, which causes degeneration or ageing.

### Oxygen Boosting

Energised water absorbs and retains more oxygen compared to tap water. It effectively increases oxygen supply and uptake in our cells. Oxygen rich water is a great booster or de-stressor every time, anytime!

## Sweet & Nourishing

You'll love the natural sweetness of Hexagon water. The exclusive mineralising cartridge infuses your water with ionic and trace minerals which are best for cell metabolism and nourishment. Every drink of Hexagon water is a treat!

## Hexagon water is mineral-rich:

Calcium, iron, magnesium, zinc, selenium, potassium, manganese, iodine, boron, phosphorus, nickel, sodium, lithium, chromium, copper, cobalt, molybdenum and more!

## Soft and pH-balanced

Hexagon's mineralisation system alkalises the water. This helps to combat the unhealthy acidity in our bodies when we are stressed out or when we eat fried, preserved or processed foods. Hexagon water stays between pH7.2 and 8.5, and helps keep your system in perfect balance.

## Pure & Clean

Simple filtration is not enough given the state of water contamination today. Hexagon offers multiple layers of filtration to ensure complete removal of unwanted substances. Any bacteria or harmful microbes in the tap water will be eliminated and won't grow in this healthful water. Hexagon water is so hygienic you can completely do away with boiling! This can save a lot of time and money.

## Hexagon water removes:

Sediments, mud, rust. Bacteria, viruses. Chlorine. Organic chemicals: pesticides and herbicides, factory and urban wastes. Nitrates from fertilizer or sewage contamination. Trihalomethanes (THMs). Polyaromatic hydrocarbons and lead from centrifugal pipes

## Healthy Living Water

With Hexagon water, you will have complete peace of mind knowing that you and your family are drinking clean and healthy water with no disease-causing toxins and water that has all the wonderful life-enhancing goodness that nature intended.

# Hexagon

Hi-Energy Structured Water System

Advanced, High-Performance System

100% environmental friendly certification  
100%ABS保護環境

Approved by CIS, England  
英國CIS認證

Conform fully to United State FDA & EPA Quality Standards  
符合美國FDA及EPA的品質標準

**EC3000**

The latest Energy Converter Technology. Discharges more than several times the energy to break water molecule clusters into the smallest.  
最新轉碼科技釋放更多倍能量，使水分子團更微小。

Small water molecule cluster tested by National Tsing Hua University of Taiwan.  
台灣國立清華大學測試為小水分子團。

Conform to International Safety Standards. Effective removal of heavy metals, radioactive substances, chemicals and pesticides.  
證明符合國際安全標準能過濾一切重金屬、放射性化學藥劑及農藥。

Approved by National Safety Federation (NSF), United States.  
美國國家健康管理局認證

Cartridge 1

## Pre-filtration

Dupont MicroFree® Anti-Bacterial PP Filter and Activated Carbon Block Filter remove rust, sediments and other suspended particles, and eliminate bacteria preparing water for Cartridge 2.

Cartridge 2

## Ceramic Filtration

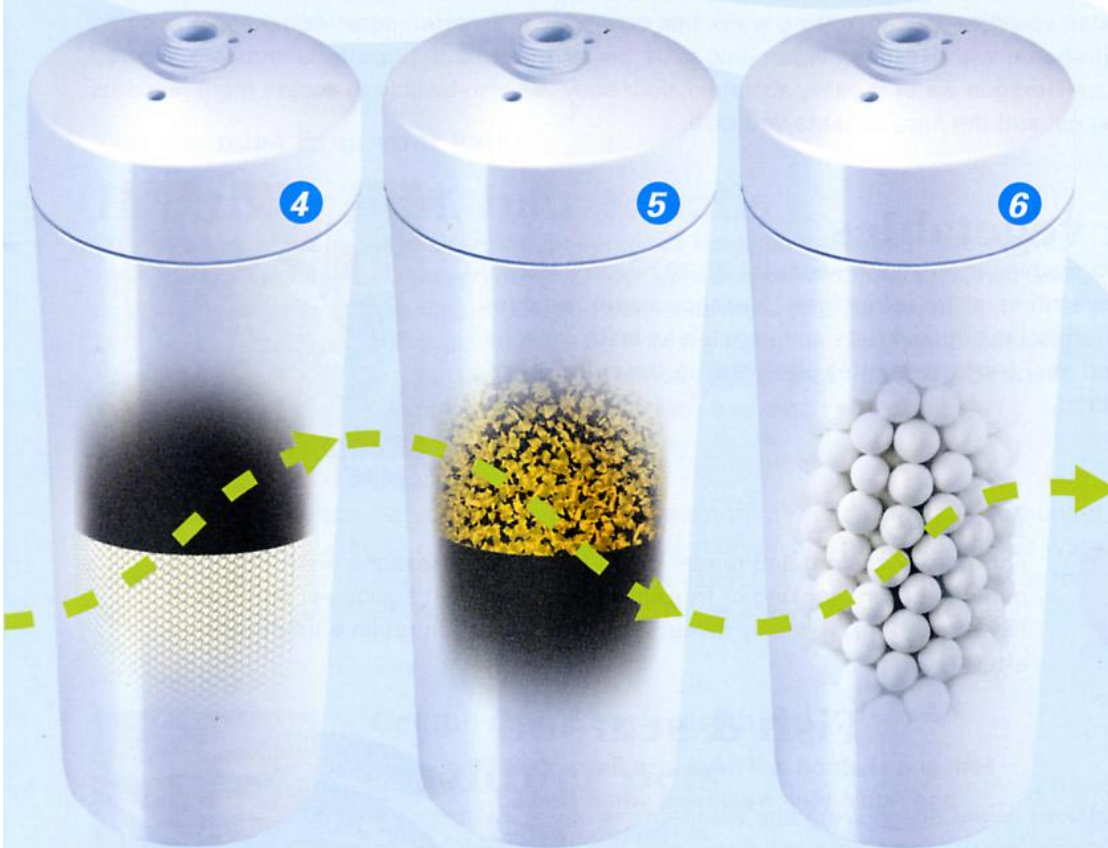

Ceramic media made from Diatomaceous Earth, deposits from the bottom of lakes and lagoons that have been compressed and baked at high temperatures. Minute pores ranging between 0.3 and 0.7 micron eliminate harmful microbes\* and particulates. Cartridge can be easily taken out for cleaning whenever surface gets dirty.

\*E.coli (1.0-1.5 microns), Salmonella (1.2-1.8 microns), Cryptosporidium (4-6 microns), Giardia (5-20 microns), Cholera and Typhoid (1 micron).

Cartridge 3

## Mineralisation

Renowned longevity stone Mai Fan Shi and an exclusive complex of mineral stones alkalise and infuse water with a wide spectrum of ionic and trace minerals.

-  Tested Food grade quality  
geprüftes Lebensmittelqualität  
德國TUV蘇德食品接觸材料認證
-  Water Quality  
Water Quality certified by  
Water Quality Association,  
United States  
符合美國水質標準
-  Water quality approved by  
Member of SGS group  
(Society general de Surveillance)  
獲SGS檢驗合格認證
-  Water quality approved by  
British By-laws Scheme

-  ISO/IEC 6 25  
AKREDITASI  
**SMM**  
MALAYSIA

Cartridge 4

### Primary Purification

Ion exchange resins soften water, while the Activated Carbon Block adsorbs unpleasant odours, colours, and toxic substances such as chlorine, trihalomethanes, organic chemicals and even radioactive compounds.

#### Cartridge Replacement

Yearly

Cartridge 1  
Cartridge 4

Every two years

Cartridge 2  
Cartridge 5

Cartridge 5

### Secondary Purification

Activated Carbon Block, KDF and Granular Activated Carbon remove residual chemicals and toxins which include heavy metals and dissolved toxic gases (methane and hydrogen sulfide).

Lifetime

Cartridge 3  
Cartridge 6

Cartridge 6

### Energisation (EC3000)

Far Infrared Rays generating bio-ceramic beads made of 26 mineral oxides emit three times more intense FIR than other water filtration systems with FIR properties. These energy-converting beads activate water's life force - water regains healthful energy, enriched with oxygen and restructured into small hexagonal clusters.
